1.0 PURPOSE

To inform all Field Service and Technical Support personnel of the proper Heparin Pump module machine configuration on 2008K/K3/T hemodialysis machines.

2.0 SCOPE

The following outlines the proper heparin pump module machine configuration:

- When a heparin pump is being used, the Heparin Pump Service Mode option must be set to Yes.

- When a heparin pump is not being used but will be left installed and plugged into the machine, the Heparin Pump Service Mode option must be set to Yes. If the Service Mode option is set to No, the heparin pump motor will get warm or hot to the touch.

If there are any questions regarding this bulletin, contact Fresenius Technical Support at 800-227-2572.
