**Procedure Card**

**Initiating Treatment**

This procedure card is not intended to replace the advice or training from your doctor or peritoneal dialysis (PD) nurse. Please refer to the [Liberty® Select Cycler User's Guide](#) for detailed information on device description, instructions, contraindications, warnings, and precautions. With this and all other peritoneal dialysis procedures, always use aseptic technique. This information is provided for QUICK REFERENCE only. Please follow the directions as they appear on the Liberty Select cycler screens. Wait for the machine prompt before going to the next step.

**Note:** All pictures are for example only.

1. Make sure the cycler is plugged into a grounded outlet
2. To make any changes to the therapy, patient, options or hardware choices, make them now by pressing **My Settings**
3. Gather supplies:
   - Solution bags (Check S.C.A.L.E.)*
   - Liberty cycler set
   - stay*safe® organizer
   - stay*safe caps
   - Drain line(s) or drain bags
   - Hand sanitizer
4. If using the IQdrive, insert it into the USB port located on the back left side of the Liberty Select cycler when facing the front of the cycler
5. Prior to insertion, inspect cassette tubing and film for possible damage
6. Mask and wash hands

Set-Up

- Connect heater bag to line with **RED clamp**
- Connect additional solution bags to lines with **WHITE clamp**
- Connect last bag to last bag option with **GREEN clamp**, if required
- Connect drain line or drain bags to line with **YELLOW clamp**
- Ensure heater bag is placed evenly on heater tray/scale
- Press **Next**

1. Turn on your Liberty Select cycler using the white power switch on the back of the cycler
2. Return to Ready screen and make sure your prescription information is correct
3. Press **OK** to start treatment
4. Torn patient connector into stay.safe Organizer
5. When directed:
   - Connect heater bag to line with **RED clamp**
   - Connect additional solution bags to lines with **WHITE clamp**
   - Connect last bag to last bag option with **GREEN clamp**, if required
   - Connect drain line or drain bags to line with **YELLOW clamp**
   - Ensure heater bag is placed evenly on heater tray/scale
   - Press **Next**

When directed:

- Break cones on the heater and solution bags with fingers or stay*safe Handi-tool
- Bend cone back and forth until completely separated
- Clamp solution lines that are not connected to a bag
- Press **Next**

*Solution, Clarity, Amount, Leaks, Expiration Date
### Initiating Treatment (continued)

**Set-Up**
- Verify all solution bag connections match those on the screen
- Press **Next**
- The cycler will now flush the solution/drain lines

**Priming**
- Verify that the blue clamp is open
- Press **Next** to prime the patient line (blue clamp)

**Prime Complete**
- When priming is complete, inspect the patient line (blue clamp) to ensure it is completely filled with fluid
- Press **Back** to prime again, as necessary
- Close the blue clamp and press **Next**

**Daytime Exchange**
- Enter **YES** if you filled your abdomen with solution without using the Liberty Select cycler (manual exchange)
- Enter the fill volume from your manual exchange. Press **Next** to continue
- Review the settings just entered and then press **Next** again

**Ready for Treatment**
- Once you are connected, open both catheter and blue patient line clamps
- Press **Next** to continue
- Your treatment will now begin

---

**Indications for Use:** The Liberty Select cycler is indicated for acute and chronic peritoneal dialysis. The stay•safe connectors are indicated for acute and chronic peritoneal dialysis.

**Caution:** Federal (US) law restricts these devices to sale by or on the order of a physician.
